Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/826,772	Applicant(s) TOMINAGA ET AL.	
	Examiner Scott Kastler	Art Unit 1793	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/20/2007 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 36-38 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for confirming that curved surfaces produced have a radius of curvature of between about 0.5 mm and 3 mm, does not reasonably provide enablement for a radius of curvature of 0.5 mm or larger as recited in independent claim 36. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The disclosed range of R (radius of curvature) disclosed in the specification at pages 15 and 16 is smaller in scope than that recited in the newly presented claims and the specification therefore is not enabling for the entire scope of the claims as presently written.

Claim Rejections - 35 USC § 102

Art Unit: 1793

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 38 is rejected under 35 U.S.C. 102(b) as being anticipated by either of Statnikov'726 or Prokopenko et al. Each of Statnikov'726 or Prokopenko et al in their respective claims for example, teach a workpiece in which fatigue life is improved through the use of ultrasonic impact treatment, thereby showing all aspects of the above claim since in a product by process claim, such as instant claim 38, the process employed cannot be relied upon to lend patentability to the claim unless it can be shown that the process steps result in a materially different product.

Response to Arguments

Applicant's arguments filed on 9/20/2007 have been fully considered but they are not persuasive. Applicant's argument that the instantly recited process steps are not shown or suggested by the applied prior art are not convincing with respect to the rejection of product by process claim 38 because as stated above, in a product by process claim, such as instant claim 38, the process employed cannot be relied upon to lend patentability to the claim unless it can be shown that the process steps result in a materially different product. No such showing has yet to be presented.

Art Unit: 1793

Applicant's arguments regarding instant claims 36 and 37 are convincing in that none of the cited or applied references show or fairly suggest the instantly recited "confirming step", however as stated above, the specification does not fully enable this step as presently written.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Kastler whose telephone number is (571) 272-1243. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
